KONA™ Tanning Company

I love sunless tanners I will try them all before I am done. But while I love having a golden glow there are a lot of sunless tanners that made me look more Snooki then just back from vacation sexy. When I was offered the chance to try Kona Tanning Companies Sunless tanner I couldn't say yes fast enough. I mean these folks tan the Victoria's Secret Fashion Models, hello!

Keep reading to find out if it works for us non-models and see a swatch...

The Kona gradual tanner has none of the usual self tanner smell, just a nice soft citrus scent. The formula feels like a nice rich lotion and covers really well. I like to apply before bed, let it dry thoroughly then wake up with a golden glow. The color is a gorgeous natural tan color and it doesn't cause any streaking or weird orange shades. One big thing for me is how self tans fade, I love how naturally the Kona Gradual Tanner fades. Even if I can't apply for awhile the color naturally fades without leaving any strange marks.

The photo below is taken after two days use of the Kona Gradual Tanner. As you can see if added a lot of color to my skin but the shade is very natural. This is a really amazing self tanning product for newbies or sunless tanning junkies like myself. You get a lot of product for the money and a little goes a long way.

This little tanning spray is amazing! It has a micro fine mist that helps to really cover my skin. It has zero odor and dries really fast you can apply in the morning and be glowing for a night on the town. A really gorgeous authentic golden tan color. I love that its small enough to travel with so you can look great on the go. The great color can help hide skin imperfections and have you ready to wear your skimpiest summer outfits.
